

DIAMOND FX STATEMENT

For anyone concerned about the safety of these products due to the labelling the following statement was issued by Diamond FX:

Neon-UV colours are available in limited range of colours which are; Orange, Pink, Magenta, Yellow, Green, Blue, Violet and White.

With Day Glow Colours, the dye is embedded in a resin and has no direct contact with the skin. Neon colours have never been officially approved for cosmetic purposes, only so called phosphorescent colour pigment is used. In 2000 it was approved by the FDA for use as a cosmetic item. USA is the only country in the world where such an item may be distributed labelled as "for cosmetic purposes".

Diamond FX had to be certain this colour additive was free of any hazardous materials. Supplier data sheet and independent laboratories confirmed this.

DIAMOND FX AQUACOLOR WAS GIVEN TO A HIGHLY RECOGNIZED DERMATOLOGIST TO VERIFY SKIN TOLERANCE AND TO MAKE SURE THAT THE PRODUCT WOULD NOT HARM SENSITIVE SKIN WHEN BROUGHT INTO CONTACT.

DIAMOND FX NEON COLOURS ARE HARMLESS TO THE HUMAN SKIN.

The statement "NOT A COSMETIC ITEM, not intended for cosmetic application" is for legal reasons only.

Diamond FX wish to offer you the finest and most exciting cosmetic products.

Diamond FX will always make sure that its products are safe to use. We will always use the best and safest raw materials available on the market to guarantee the user comfort.

FROM DIAMOND FX, AS YOUR PROFESSIONAL PARTNER IN FACE AND BODYPAINT AND SPECIAL EFFECTS.
